APPENDIX IV.

(Vide answer to Question No. 176.)

Copy of report dated 18th November 1925 from K. K. Joseph, Supervisor, the Cochin Orchards and Canneries, Ltd., Trichur.

In reference to your order regarding the explanation of the night-soil burying in the Orchards premises, I beg to report the following:—

This is a question from the Municipal Office for the explanation of a complaint previously asked and which I have already submitted when questioned for. But I beg to submit the following for Master's kind information.

(1) The ten cartloads of night-soil which are daily transported to these premises are every day thrown into the trenches made fit for holding the same with sufficient rubbish and are covered properly to avoid the troubles and to gain the real benefit of the stuff. This work has caused to the entire satisfaction of the Municipal authorities as well as the Managing Director who have often visited and examined the locality.

(2) This complaint might have been raised for the actual removal of the night-soil from this place, which is a thing of impossibility. For this is the only place hardly inhabited and 3—4 miles remote from the Trichur Town.

Lastly, I beg to submit that now this burial has been shifted to a place invisible to the public and is done properly as usual.

So, these explanations may be valued and caused to the satisfaction of the authorities who can freely come and examine the locality.
